---

Experienced .NET Developer with 3+ years of expertise in building and maintaining applications using the ASP.NET Core .NET Framework, WCF, and SQL Server. Skilled in developing web services, implementing RESTful APIs, and working with TFS for version control and project management. Proficient in deploying and managing applications in Azure, with a strong understanding of cloud services and DevOps practices. Adept at delivering high-performance solutions in Agile environments.

Experience

Nagarro, Feb 2022 – Present   **Gurugram, Haryana**
Software Engineer   *Feb 2022 – Present*

- Client automates the loan application, scoring, decision and documentation phase for corporate credit, mortgages and personal loans by providing a configurable case management system that supports the loan origination process.
- The project involved the development of new features to the existing software using the agile model. Applications are created using K2 platform features to manage the application workflow process.
- Design and implement robust plugins to integrate seamlessly with both external and internal services, enhancing system functionality and efficiency.
- Develop and customize features to meet customer-specific requirements efficiently, alongside creating optimized database objects (Stored Procedures, Functions, and Triggers) to facilitate efficient data processing and transaction management.
- Provided on-call support and incident management, responding to production issues and minimizing business disruption through rapid troubleshooting and resolution.
- Tech:- ASP.NET Core, .NET Framework 4.x, WCF, SQL Server, VueJS, IIS Manager, Azure DevOps, K2 black pearl 4.7/ 5.4

Projects

Movie Ticket Booking Application | *Asp.Net Core WebAPI, Angular, MySQL*   **October 2022**

- Developed an web application consisting of admin and user view
- User authentication: Implemented user authentication and authorization using Sessions.
- Implemented:- ●Admin view and User view. ●Admin have certain privileges to add a movie, remove, update a movie or approve a review and User can give rating and book ticket ●Users have certain privileges to book ticket with Date and availability, can give rating

Ecommerce Website | *ReactJS, NodeJS, Firebase Database, Stripe Payment Gateway*   **March 2022**

- Developed an website where user can buy products, add to cart, can mark in wishlist, search product by category or name and checkout products.
- Implemented Payment Gateway using stripe for secure payments and use Node to implement api to connect with payment server.
- Use Firebase Database to store data and storage to store product images.   Link

Education

Dr. APJ Abdul Kalam Technical University   Sep. 2018 – May. 2022
Bachelor of Technology in INFORMATION TECHNOLOGY   *Azamgarh, Uttar Pradesh*

Relevant Coursework

- Data Structures
- Database Management
- OOP Web Development
- Software Development Methodology

Technical Skills

Programming: CSharp, JavaScript, C++
Framework/Libraries: ASP.NET, ASP.Net core MVC, .NET core web API, AngularJs, ReactJS, VueJS, Microservices architecture
Database: MS SQL Server, T-SQL, LINQ
Familiar: SOLID Principles, Design Patterns, Azure DevOps(tfs, CI/CD), Agile Methodology, IIS Manager, MVC Pattern, WCF, Git, JIRA, K2 Management, Linux
